

PRESS RELEASE

23rd January 2023

Approach and Board of Cyber form an alliance to strengthen the cyber-security of companies in Belgium and Switzerland

The partnership agreement finalised between Approach and Board of Cyber provides Belgian and Swiss companies with continuous notation system for scoring cyber-performance.

Approach – specialists in cyber-security and the protection of personal data – has come together with Board of Cyber, a French company specialising in cyber risk management so as to add the Security Rating® solution to the services it provides. This automated, fast, and non-intrusive SaaS solution will mean that its clients will be able to continuously evaluate the cyber-risks to their organisations and to that of their suppliers, and thereby improve their performance in terms of cyber-security.

Approach provides its clients with services covering consultancy, audit, training, and awareness, as well as the implementation and development of security technologies, and the services of an MSSP (managed security service provider). With Board of Cyber, Approach is therefore strengthening its “Cybersecurity Assessment Solutions” and its Audit and Awareness services. Its clients will be able to tackle all the major cyber issues: anticipation, prevention, protection, detection, reaction, and recovery (cyber resilience), and thereby to create an environment of trust.

A specialist in cyber-resilience

Approach specialises in cyber-security and the protection of personal data. It offers all-round solutions for the improvement of cyber-resilience: anticipation, prevention, protection, detection, reaction, and recovery. Approach is a scale-up with a team of a hundred or so people spread over several sites in Belgium and Switzerland. The company holds an ISO 27001 certificate and has a verified ISO 27701. Approach has been awarded the Cybersecurity Made in Europe™ label.

“I am delighted that a market leader such as Approach has chosen Board of Cyber to strengthen its range of services for Belgian and Swiss companies. We share the same vision of service, providing solutions with immediate added value.”

François-Charles Fachon, Channel Manager of Board of Cyber

“Board of Cyber and its Security Rating® solution provide a clear, fast and simple means for business leaders to manage the cyber-risks to their companies and their ecosystem. It is perfectly suited to the Belgian market for companies looking for pragmatic and financially competitive tools. Another advantage is that it is a European solution, and this issue of strategic independence is essential given the increasing number of regulations and standards.”

David Vanderoost, CEO of Approach Belgium

ABOUT BOARD OF CYBER

Board of Cyber is a SaaS expert in cyber-risk management. With Security Rating®, its automated, fast and non-intrusive SaaS, Board of Cyber provides continuous evaluation of the degree to which companies and other organisations are open to cyber-risks, and improves their performance.
